

Meet our Olympians!

Exploring the World of Science

Please help us congratulate these great teams who excelled at our recent Elementary tournament.

These teams distinguished themselves as either top-performers, or most improved teams in our recent tournament. Each team competed in 16 separate science events which covered a wide range of disciplines, from geology to chemistry to astronomy, to literally rocket science! They studied, they designed, they built, and they mastered challenging topics in addition to their many other activities and daily classes. These students have demonstrated the discipline and dedication that gives us confidence that we've met some leaders of tomorrow!

Macomb Science Olympiad is a non-profit, 501(c)(3) organization, dedicated to expanding the science curriculum beyond the classroom, creating a technologically-literate workforce and providing recognition for outstanding achievement by students. Each year, we host two major tournaments for students in Macomb and St. Clair Counties: one for Elementary students, and another for Middle and High School students.

Macomb Science Olympiad provides training and workshops for coaches and students, both directly, and in partnership with many other local organizations. We bring together volunteers from our community to provide an exciting learning environment for these great students. To learn more, or to get involved, visit our website at www.macombso.org.
